Statement of participation

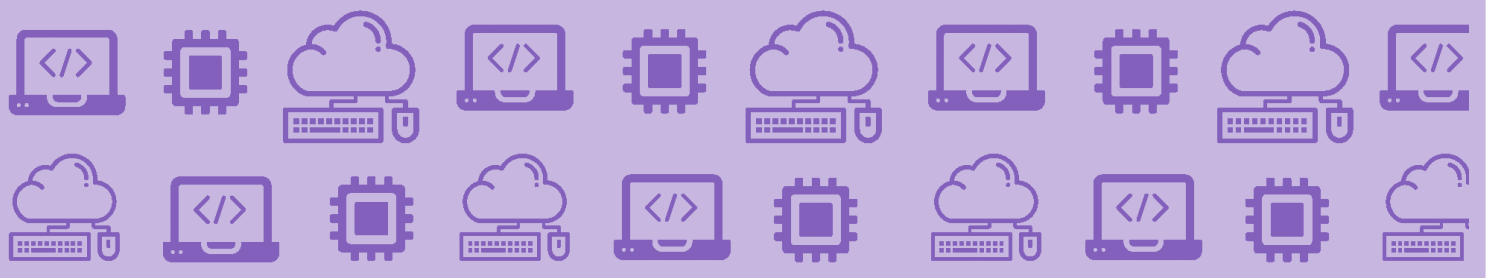

Zain Abid

has completed the free course including any mandatory tests for:

Internet of everything

This free course introduced fundamental concepts and technologies that enable the IoE.

Issue date: 2 November 2026

The Open University

Internet of everything

https://www.open.edu/openlearn/digital-computing/internet-everything/content-section-overview

Course summary

The internet of everything (IoE) is the networked connection of people, process, data and things. As more people, data and things come online, we develop processes to harness the vast amounts of information being generated by all these connected people and things. The goal of this free course is to introduce you to fundamental concepts and technologies that enable the IoE and the internet of things.

Learning outcomes

By completing this course, the learner should be able to:

- explain the impact of the internet of everything (IoE)
- explain the interactions between people, process, data, and things that form the IoE
- configure networked devices and applications to support a given IoE implementation.
- explain the benefits and challenges of the IoE
- explain modelling and prototyping in the IoE.

Completed study

The learner has completed the following:

Session 1

Session 1: What is the IoE?

Session 1 quiz (score 100%)

Session 2

Session 2: Pillars of the IoE

Session 2 quiz (score 100%)

Session 3

Session 3: Connecting the unconnected

Session 3 quiz (score 98%)

Session 4

Session 4: Transitioning to the IoE

Session 4 quiz (score 97%)

Session 5

Session 5: Bringing it all together

Session 5 quiz (score 95%)

Final assessment quiz (score 100%)
